├── index.html // Home Page
├── sell-dummy.html // The Selling Form for User.
├── terms-conditions.html // Terms and Conditions Page Placeholder.
├── trading.html // The logged in User's Console for buying and selling.
└── .gitignore # For Git Collaboration.
```

Please keep .gitignore as it is, for ease of working on different IDEs.

Assignment 1 Login Credentials & Forms

There are 2 dummy users created:

- A normal user:

- Email: dong@yi.guo
- Password: l@mUser1

Logging in with credential above will result in User Console (Trading Page)

- A manager:
 - Email: dongyi@guo.xyz
 - Password l@mUser2

Logging in with credential above will result in Manager Console (Master Trading Page)

Tourists (not-logged users) can get market information through "Pricing" page, and search bar will work with it while backend joins.
